(SINGLE DIGITS-3 TERMS)

DIRECTIONS: Watch how we can add three values in a row.

First we'll do it. Start by adding the first two numbers and then add the third.

$$\begin{array}{r}
 8 \\
 7 \\
 + 6 \\
 \hline
 \end{array}
 \rightarrow
 \begin{array}{r}

DIRECTIONS: Solve the word problems.

There were three boxes under a tree. One box had nine (9) toys, one box had nine (9) toys, and one box had another nine (9) toys. How many toys in all?

$$9 + 9 + 9 = 27$$

A lemon tree was dropping lemons. The tree dropped eight (8) on Monday, eight (8) on Tuesday, and another eight (8) on Wednesday. How many lemons dropped in all?

$$8 + 8 + 8 = \square$$

Bobby liked to collect comics. He bought seven (7) one week, another seven (7) the next week, and only five (5) on the third week. How many comics did he buy?

$$7 + 7 + \square = \square$$

The teacher had to clean up after some very messy students. She filled up nine (9) pails one day, seven (7) pails the next day, and five (5) pails on the last day. How many pails of garbage did she collect?

$$9 + \square + \square = \square$$

Eight (8) new buses were used on the first day of the trip, seven (7) new buses were used on the second day, and nine (9) new buses were used on the third day. How many new buses were used in all?

$$\square + \square + \square = \square$$
